

Waleed Khalid

Software & Project Engineer

Experienced Full-Stack and Backend Engineer skilled in PHP (LAMP/CodeIgniter), Node.js, NestJS, React, Angular, and Python. Strong expertise in building scalable web applications, APIs, database design, and optimization across MySQL, PostgreSQL, MongoDB, and Firebase. Experienced in developing enterprise systems including HRMS, e-commerce, and automation platforms with third-party API integrations, CRM systems, and role-based workflows. Skilled in query optimization, backend performance tuning, and system scalability improvements. Proficient in DevOps and cloud infrastructure including Docker, CI/CD (GitLab), Linux server management, AWS instance deployment and configuration, Google Cloud, and Vercel deployments.

WORK EXPERIENCE

Full Stack Developer

FullStop

Aug 2024 - Present | Remote

Accomplishments / Tasks

- Built and enhanced core features for the Auction marketplace, including auction workflows and tax automation using third-party APIs.
- Integrated TaxJar for accurate multi-state sales tax calculation and improved transaction reliability.
- Integrated Firebase services for authentication, real-time database management, and cloud storage to support scalable marketplace functionality.
- Developed and deployed serverless backend functions using Google Cloud Functions for automation, event-driven workflows, and API processing.
- Managed CRM integration (Zoho CRM) to streamline customer data handling, lead tracking, and sales process automation.
- Integrated NFT minting into an image platform, enabling users to convert images into blockchain-based assets.
- Built backend services in Node.js and connected blockchain APIs for seamless minting and transaction handling.

Project Engineer

SOAP Engineering

Apr 2023 - Nov 2024 | Remote, United States

Achievements/Tasks

- Maintained and optimized Python scripts for automated report generation using pandas.
- Worked with SQLite and MySQL databases, handling configuration, query optimization, and data management.

Software Engineer

Codex Squared

Feb 2022 - Apr 2023 | Islamabad, Pakistan

Achievements/Tasks

- Managed and maintained multiple full-stack projects using the MEAN stack, React, and NestJS.
- Led a small development team, coordinating tasks and ensuring timely delivery of features.
- Implemented new features and optimized existing database queries to improve application performance.

SKILLS

React NestJs Redux Angular CLI
Node Python MySQLite DB MongoDB
PHP (core) CodeIgniter3 CSS3 HTML5
MySQL DB jQuery Linux Git PM2
AWS Bash Express Js Postgress
Sequelize Docker Javascript

PERSONAL PROJECTS

Etacrafts (Online Shop Store)

Role

Dec 2021 - Present

Key Features

- AngularJs / NodeJs / MongoDB / ExpressJs / Mongoose

PoaFresh (Online Shop Store)

Role

Apr 2021 - Jul 2021

Key Features

- Laravel / PHP / MySQL

TradeMark

Role

Mar 2021 - Dec 2021

Key Features

- Node.js / Express / Puppeteer / Scrapper

FacinateShop (Online Shop Store)

Role

Apr 2020 - Oct 2021

Key Features

- Angular Cli / Node.js / Express / MongoDB / Python3 / PHP / MySQL

WORK EXPERIENCE

Senior Web Developer

Vizz Web Solutions

Apr 2019 - Feb 2022 | Islamabad, Pakistan

Achievements/Tasks

- Managed multiple backend projects built on the PHP LAMP stack (custom applications and CodeIgniter).
- Led development of full-stack applications using the MEAN stack.
- Handled DevOps workflows, including Docker containerization, image management, and CI/CD pipelines using GitLab.
- Configured and maintained Linux-based dedicated servers for application deployment and performance.
- Delivered new features and optimized legacy database queries to improve system performance and scalability.

Web Developer

Toor360

Oct 2018 - Apr 2019 | Rawalpindi, Pakistan

Achievements/Tasks

- Managed company websites and online portals, handling updates, content maintenance, and file management.
- Developed responsive website templates using HTML5 and CSS3 with modern UI practices.
- Built dynamic web applications using PHP (XAMPP environment), ensuring backend functionality and server-side processing.
- Designed and managed MySQL databases using phpMyAdmin, including schema creation and data management.

PERSONAL PROJECTS

Yolleo (Codeigniter3)

Role

May 2020 - Jun 2020

Key Features

- PHP / MySQL

Inventory System (Codeigniter3)

Role

Apr 2020 - May 2020

Key Features

- PHP/ MySQL

EDUCATION

Associate Degree Program (Computer Science)

University of Central Punjab

Jun 2016 - Jun 2018 | 3.55 / 4.00 CGPA

LANGUAGES

English

Professional Working Proficiency

Urdu

Native or Bilingual Proficiency

INTERESTS

Travelling
